WHY SHAKECOMMAND?

Enhanced Situational Awareness
Stay informed at all times.

Fast & Reliable
Immediate access to real-time and historical data for each site.

Seamless Integration
Operates in conjunction with SeismicAI's EEW system or as a standalone tool.

Actionable Insights
Helps organizations prepare, respond, and recover efficiently.

REAL-TIME EARTHQUAKE SITUATIONAL AWARENESS

ShakeCommand is a web-based dashboard designed to give organizations real-time insights into their earthquake risk and response status. Whether used as a standalone solution or as an add-on to SeismicAI's Earthquake Early Warning (EEW) system, ShakeCommand provides a clear, centralized view of your organization's earthquake preparedness and impact assessment.

LIVE ORGANIZATIONAL STATUS

- View all company sites and branches in a consolidated view.
- Get real-time updates on how each location is affected when an earthquake occurs.

HISTORICAL EVENT TRACKING

- Access a detailed history of past earthquakes which affected your site.
- Instantly review recent seismic events and their impact on your sites.

SeismicAI

REAL-TIME ALERTS & REPORTS

- Shows Immediate alerts when an earthquake is detected.
- Detailed, comprehensive impact reports available at the click of a button, providing insights into past incidents and responses.
- One-click access to critical information on organizational readiness and response.

USER-FRIENDLY WEB INTERFACE

- Intuitive dashboard designed for quick and easy access to critical data.
- Helps organizations understand their earthquake risk and response status effortlessly.

ABOUT SEISMICAI

SeismicAI delivers real-time earthquake early warning solutions, providing organizations with critical time to prepare before an earthquake, and post-event analysis to accelerate recovery. With innovative high-precision technology deployed worldwide, global offices and international collaborations, SeismicAI leads organizations to business continuity and seismic safety .
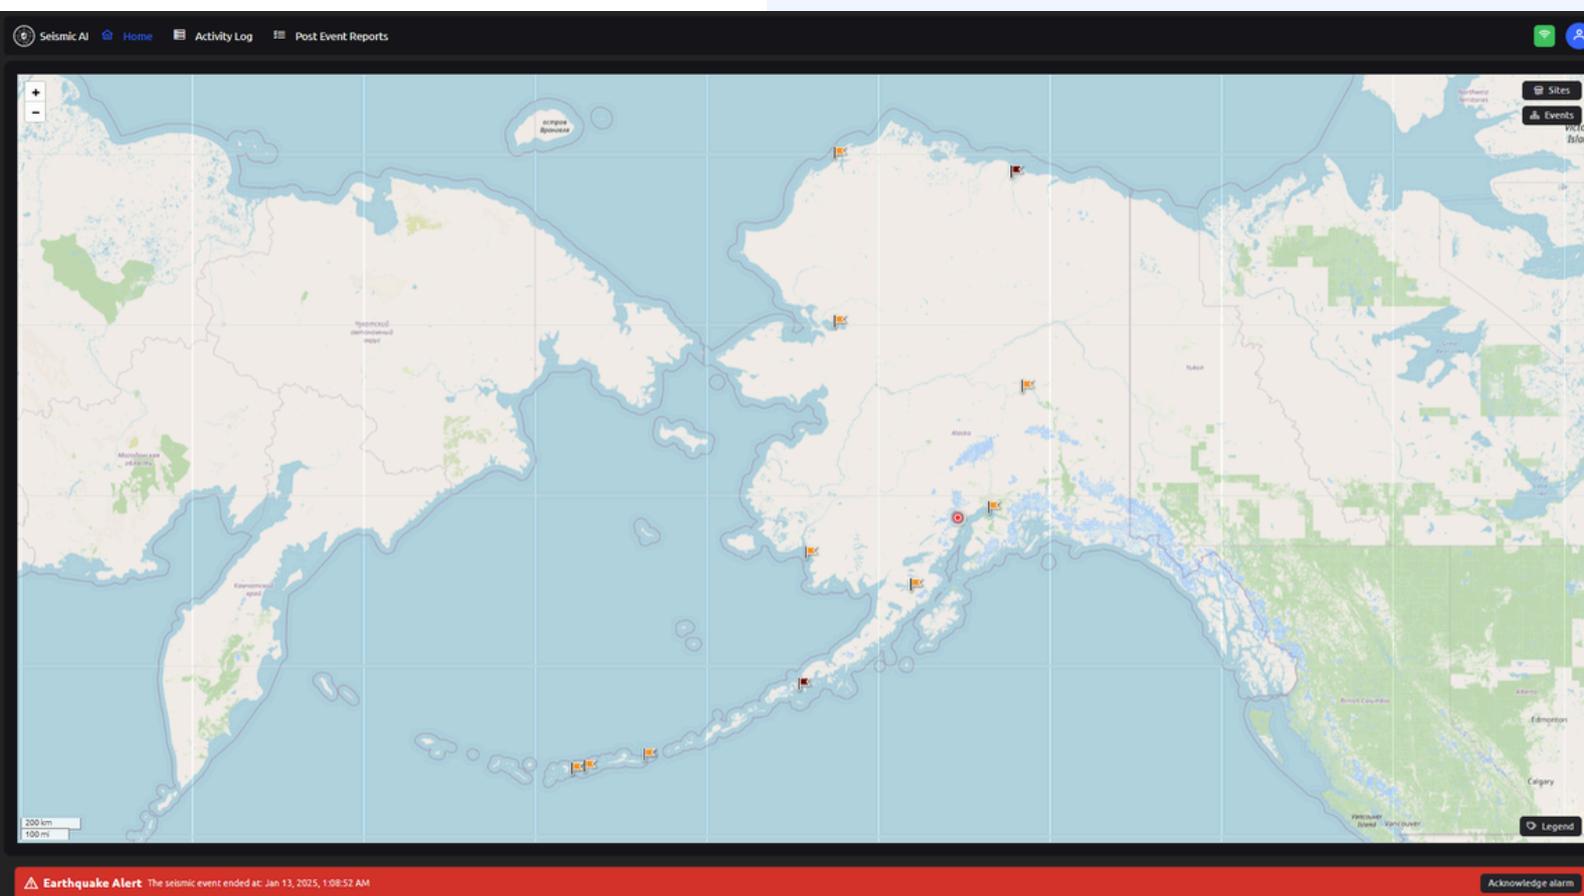

Join our journey to a safer world for businesses, governments and civilians
